

Essential Steps: Water Use

of water was extracted from the environment in Australia in 2015-2016¹

was spent by industry in Australia in 2015-2016 on water and related services²

of total water consumption in Australia is by the agriculture, forestry and fishing industries³

Steps to a happy planet

01
Replace existing equipment with more water efficient alternatives.

02
Use brooms, where possible, to clean floors, footpaths and other hard surfaces.

03
Install rainwater tanks.

Refer to the relevant environment authority in your jurisdiction for further information
